

# PRESS RELEASE

**WFCCN join partners to launch  
Global Sustainable Health Equity Movement  
2 July 2020**

June / 2020

**WORLD FEDERATION OF CRITICAL CARE NURSES**

# WFCCN join partners to launch Global Sustainable Health Equity Movement 2 July 2020

WFCCN is a founding partner of the Global Sustainable Health Equity Movement, a collective of international health care organizations committed to working with the United Nations and World Health Organization to apply pressure to global authorities for a more sustainable distribution of health knowledge and resources, especially to those regions of the world that are most vulnerable.

The event will put the spotlight on the unacceptable global health inequities that have been amplified by the COVID-19 pandemic. We believe that it is within our collective power to address these inequities. The event will be addressed by UN and WHO leadership, as well as members of the interim steering committee of the movement, including Mr Adriano Friganovic, President, WFCCN.

**The event will be hosted at the University of Massachusetts Medical School's zoom platform: July 2nd, 2020 - from 8:00-9:30am (New York time) - 2:00 to 3:30pm (Geneva Time) Please register in advance for this**
